

CORONAVIRUS (COVID-19) & Infection Control

The Enviro Clean Process*

Scope

Enviro Clean Restore (ECR) will inspect and scope the property for cleaning to a desired outcome. We will provide a written scope, schedule, and estimate upon request. Currently, ECR is categorizing infection decontamination projects into the following 3 tiers:

- Category 1: **Proactive cleaning**
No confirmed cases. Precautionary cleaning.
- Category 2: **Unknown Contamination**
No confirmed cases. Suspicion of infected person.
- Category 3: **Confirmed Contamination**
Confirmed infected occupant of space

Decontamination Process

ECR uses all EPA approved plant-based chemicals engineered to combat viruses and bacteria. Before application ECR will contain the areas in question.

Category 1:

ECR Technicians will utilize fogging machines to apply our disinfectants to the air and to surfaces. High touch points/surfaces will be directly cleaned.

Category 2:

Category 1, ECR technicians will detail clean and disinfect all exposed surfaces by hand. Negative air may be established to assist in air exchanges to create a healthier environment.

Category 3:

Category 2 process, ECR may include the use of ozone or hydroxyl-ozone generation under written authorization only.

Test

Although there are no specific surface or air quality tests as we know for COVID-19 or other specific viruses, ECR has the ability to test on demand surfaces using an ATP method of surface wipe. This will show the presence or absence of potential contaminants.

Pricing

Contact our office for current pricing schedule. Pricing may be by the square foot, cubic foot, or considered “time and material” based on the needs of client.

Our Guarantee

Enviro-Clean Restore is a trained and certified restoration company with experience cleaning and disinfecting occupied spaces and structures. Given the current state and unknown variables of viruses and specifically COVID-19, ECR will mitigate spaces only and makes no claims for sterile environments or preventing any persons from acquiring Coronavirus, COVID-19 or any other illness.

Disaster Emergency Plan

Be better prepared! Schedule an appointment now to learn about our Priority Disaster ERP program and technology.

**The Enviro Clean cleaning process was developed based on the best information available provided by organizations like the Center for Disease Control, Environmental Protection Agency, OSHA and specific restoration industry certification bodies. Our goal is to provide the most thorough cleaning of any indoor environment not specific to COVID-19 or any other microorganism. We cannot guarantee and make no promises to affect the indoor environment to have an impact (positive or negative) to one's health before or after cleaning.*
